

MISTING TRAILER

THE PERFECT GUEST AT ANY SUMMER EVENT!

Australians love summer, especially being outdoors. Unfortunately it sometimes gets too hot and it's important for everyone's safety that there is a place to cool down.

Ozmist are the experts in outdoor cooling, and our fully self-contained mist fan trailer is the perfect addition to any outdoor summer event, festival or school function.

Having done all the hard work of organising the event you don't want it ruined by extreme weather. The mist trailer is stand alone and gives your guests and customers a place that they can go and cool down. To operate simply fill with water and connect to a 240-volt, 10 AMP power supply. It can also be supplied with a generator if power is not available.

FEATURES

- ✓ Fitted with 6 high pressure mist fans (3 on either side)
- ✓ Built on a 8' x 5' galvanised tandem trailer the mist trailer is easily moved and ideal for events in open spaces
- ✓ The trailer contains a 1,000-litre water tank and transfer pump which delivers water to the high pressure misting pump
- ✓ The 1,000-litre water supply will last for over 8 hours
- ✓ A generator can be fitted inside the trailer if a 240-volt power supply is not available
- ✓ Easy set up and safe and secure to the public

PERFECT FOR

- ✓ Outdoor events, festivals, sporting and more
- ✓ Cooling workers on a hot job site and allow them to work more safely and efficiently
